Υπεδαφοκαλλιεργητής KOUTSIKOS της σειράς CPR με σταβάρια με βίδες ασφαλείας και διπλούς κυλινδρούς, κατάλληλος για ελκυστήρες μεγάλης επιδόσεως. Εργασία σε βάθος και δημιουργία ισορροπημένου υποστρώματος καλλιέργειας.

ΠΛΕΟΝΕΚΤΗΜΑΤΑ
- Ιδανική αποστράγγιση εδάφους
- Σωστός αερισμός
- Αποφυγή μεγάλων σβόλων
- Αύξηση παραγωγής
- Εξοικονόμηση καυσίμων & χρόνου εργασίας
- Μηδαμινά έξοδα συντήρησης

KOUTSIKOS subsoiler type CPR, fully mounted with ploughshares with safety share-bolts and double rollers, suitable for high horsepower tractors. Works in great depth for a perfectly balanced subsoil.

ADVANTAGES
- Ideal subsoil drainage
- Good aeration of the field
- Avoiding the clods
- Crop increase
- Fuel and time save
- Low maintenance costs
KOUTSIKOS subsoiler type CPR is a productive modern machine, designed to work in high speed and in great depth by high and extrahigh horsepower tractors. The ploughshares work at every layer of the subsoil crushing the clods without agitating the soil and keeping at the upper ground level all the necessary organic substances. The rollers also assist in breaking large clods and leveling the surface of the field. As a result we have a field with good aeration and excellent subsoil drainage. Using the CPR subsoiler fuel and time save are succeeded because tilling and perfect leveling are achieved in a single way of the tractor in high speed.

**Specifications**
- Fully mounted
- Rigid frame
- Ploughshares with safety shear-bolts
- Adjustable distance between the ploughshares
- 2 tiller blades per ploughshare
- Quick hitch reversible point
- Single or double roller
- Mechanical or hydraulic regulation of rollers
- Universal 3 point hitch
- 2 parking jacks

*The CPR is a subsoiler machine with a wide range of specifications.*

**Technical Characteristics**
- All parts are made of durable materials
- Frame is of high quality and durability
- Ploughshares are adjustable for different depths
- Rigid frame ensures stability and safety
- Quick hitch reversible point allows for easy attachment and detachment
- Mechanical or hydraulic regulation of rollers for precise control
